Harmony 17.0.0 (Harmony 17) is now available for Mac OS X El Capitan, macOS High Sierra, and macOS Sierra; Windows 10, Windows Server 2016; and Linux. To install or update Harmony, please visit Bug fixes. Use of DDC code from Harmony 14.0.0 has been removed. I know that this code was buggy and required a refactor, but refactoring was not done in a timely manner. The only way to obtain the “damage” code from 14.0.0 would have been a refactoring, and that is something we decided not to do. Version History. Harmony 17.0.0 (2019-06-07). Windows; macOS; Linux. Harmony 16.0.0 (2018-07-05). Mac; Windows. Harmony 15.0.0 (2018-05-15). Mac; Windows; Linux. Harmony 14.0.0 (2017-11-29). Windows; macOS; Linux. Harmony 15.0.0 documentation. Harmony 14.0.0 documentation. Harmony 13.0.0.3 (2015-07-22). Mac. Harmony 12.0.0.3 (2015-01-21). Mac; Windows. Harmony 11.0.0.3 (2014-06-10). Mac; Windows. Harmony 10.0.0.3 (2014-03-14). Mac; Windows. A: Instead of using double-tap events to adjust the values in the animation, you can use single-tap events, then adjust them in

code to adjust your values. Animation of tap events: In this animation, we use single-tap events, and each event represents one layer. In this case, to adjust the size, first you need to access the current transformation matrix of each layer and modify the size. The key here is to use the setTransformation method. For each layer, modify it to the following: `var colorTransform = myAnimation.layer(0).transform; colorTransform.a *= 0.3; myAnimation.layer(0).setTransform(colorTransform, true); let setPos = function (op) { myAnimation.layer(0).position = op. 82157476af`
